*5th Partners meeting organized online;
Hosted by Comunitatea pentru Invatarea Permanenta – CPIP
Timisoara Romania*

The current state of the Erasmus+ project „Agriskills - Innovative Skills Transfer for the Development of Agricultural Entrepreneurs” was analyzed during the 5th meeting of the partners from DE, RO, ES, PL, SK and TR. The discussion of the project partners also focused on an overview of the four Intellectual Outputs (IO) of the Agriskills project: IO1 -MAP of needs; IO2- AgriSkills Course Package; IO3- Digital Component; IO4- New entrepreneurial VIRTUAL initiative.

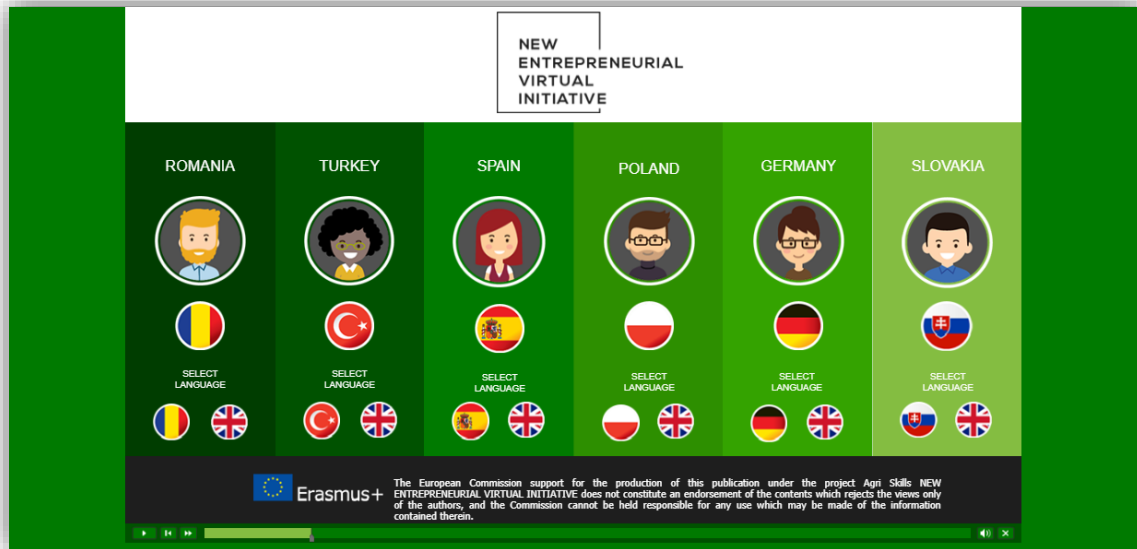

Agriskills project is now reaching its final stages!

The consortium is working together to deliver the best possible final result. During the meeting of the AgriSkills project partners, it was an excellent opportunity to highlight the progress of the latest Intellectual Output of the project, led by Comunitatea pentru Invatarea Permanenta – CPIP and co-lead by FORMACION PARA EL DESARROLLO E INSERCION, SOCIEDAD LIMITADA – DEFOIN. Agriskills is progressing smoothly and the CPIP team is working on the final touches of the IO4.

The philosophy behind the IO4 is to create a New entrepreneurial VIRTUAL initiative GAME

on how to create an enterprise on the nationally chosen topic in each partner country. The game will give the possibilities to "taste" the steps in order to create your own business in the agriculture sector.

In addition, a session for interactive questions and answers about the project implementation process in each partner country was highlighted during the online meeting of the project partners.

Keep following our partners' social media platforms to receive first-hand information about the Agriskills project! Furthermore, we would like to invite you to stay up to date by accessing:
