Skills Project

September 2019

Project now concluded

The project team met for the last time in the lovely town of Espinho, south of Porto (Portugal) in September to review and work on the conclusion of the two year project.

We had a chance to look back at the whole project and see the results of our work for the past 24 months. The project partners have worked on the production of Modules covering the Top 10 Skills and

associated practical tools and exercises. We also looked at the Impact and Sustainability aspects of the project as well as how the team has disseminated the results at all levels through our social media and direct contacts. We had the opportunity to speak about the events organised in all countries to reach adult educators, entrepreneurs, managers, trainers, employees, volunteers and teachers.

What next in the Project?

The training modules and tools are now freely available and can be used for trainings purposes aimed at employees, teachers, entrepreneurs and the general public.

The product is freely available online at www.topten2020.eu If you would like to be part in courses please contact your local Top 10 Skills partner.

The World Economic Forum has listed the following ten skills as essential for the workplace of the future:

Complex problem solving, critical thinking, creativity, people management, coordinating with others, emotional intelligence, judgement and decision making, service orientation, negotiation, cognitive flexibility

Our project has already delivered training in these important areas and modules are now up on our website

TOP TEN SKILLS 2020

New 2 Year Project approved

The new phase of the project has also been approved looking at the 2018 WEF report and how online material can be developed to help with the future job market and the changing jobs for the future.

Looking to develop the material further and add more information for the younger generation, so the Top 10 skills outlined in the Top 10 project are developed from an early age, especially emotional Intelligence.

The National Curricula in many countries of the EU provides careers advice from school age and this would highlight that not all skills are learnt in a formal way and can be developed differently. This will start with educating the teachers, lecturers and tutors about the developed of soft skills and the future job market.

For further information and online modules please look up www.topten2020.eu

Top Ten 2020 Skills Erasmus + Project
